

SÉRIE 5-10

Overhead subscriber cables 1 x 4-wire 8/10 - 5-10 series

BENEFITS

- ACOME's 5-10 series of self-supporting cables have been used for decades in fixed Telecom networks in France, Africa and the Middle East.
- From the outset, these cables have satisfied the highest quality transmission requirements. They still provide very high speed transmission for ADSL, ADSL2+ and VDSL protocols of Internet Service Providers (ISPs).

APPLICATIONS

- 5-10 self-supporting cables with 2 x 8/10 twisted pairs are designed for connecting subscribers to the local network.
- This cable is in a figure of 8.
- It is specially adapted for ADSL, ADSL2+ and VDSL applications.

GENERAL CHARACTERISTICS

1. Conductor: Red copper wire
2. Insulation: Solid polyethylene
3. Assembly: 4-wire stars
4. Waterproofing: Gel with high dropping point
5. Carrier: Galvanised steel strand
6. Sheath: Black HD polyethylene

NORMS AND STANDARDS

General

- UTE C 93-526 & UTE C 93-527-9
- ROHS 2002/95/CE

RECOMMENDATIONS

Storage and installation

The cables are supplied with protective wrapping that must be maintained until the product has been fully used.
