

ACOPTIC - CCC1575

Dielectric cables for pulling through ducts

BENEFITS

- Dielectric (no earthing required) and dry waterproof
- Compact Tube® technology for fast and easy installation and mid-span access
- Easy end terminations with no risk of tube kinking
- Low friction PEHD sheath for long-span blowing performance

APPLICATIONS

- ACOPTIC® brings together ACOME's optical cables solutions for Telecom networks.
- CCC1575 cables are designed for long-distance pulling through ducts thanks to a high level of tensile strength resistance.
- Generally used for duct POP interconnection or in the transport part of the FTTH access network.

RECOMMENDATIONS

Storage and installation

- The cables are supplied with protective wrapping that must be maintained until the product has been fully used.
- The rules for storage, transport, and cable laying are described in our ACOPTIC Guide.
