

## ACOPTIC - CCD1481

LSOH steel-reinforced building connection cable

### BENEFITS

- Compact Tube® technology for fast and easy installation
- The low-friction sheath material makes it easy to use in ducts.
- The LSOH-FR\* sheath offers added safety to building occupants.
- High mechanical resistance to shocks, crushing and rodents.
- Excellent rodent protection.

### APPLICATIONS

- ACOPTIC® brings together ACOME's optical cables solutions for Telecom networks.
- CCD1481 cables are designed to allow for the use of a single cable for passing between the exterior and interior of a building. It therefore offers resistance to outdoor conditions (UV stability, etc.) and indoor conditions (LSOH-FR\*).
- Generally used from the last outdoor junction box to the cable box inside the building.
