

## ACOPTIC - CCD1481

Indoor / Outdoor Optical Fibre Cable for Installation by Pulling - Steel Armoured - LSOH From 12 to 288 fibres

### BENEFITS

- Steel armor: high rodent protection
- LSOH flame-retardant sheath
- Compact-Tube® technology for tool-free access to the fibre and easy storage of the module in Connectivity.
- Easy cable preparation with no risk of kinks on Compact-Tube® optical elements (end or mid-span).

### APPLICATIONS

- ACOPTIC® is the brand name for ACOME Groups optical fibre cable solutions for telecom networks.
- This cable is recommended for connecting outdoor and indoor networks, thanks to its LSOH flame-retardant sheath made from low-smoke, halogen-free material.
- They benefit from excellent mechanical protection: a corrugated steel armor placed between two thermoplastic sheaths provides excellent resistance to impact and crushing, as well as perfect protection against rodents.

### RECOMMENDATIONS

#### Mise en oeuvre

- Les câbles sont fournis avec un emballage de protection qui doit être maintenu jusqu'à complète utilisation du produit.
- Les règles de stockage, transport, et pose des câbles sont définis dans notre guide ACOPTIC.

#### IMPLEMENTATION

- [Help Card in Preparation for Connection](#)
