

ACOPTIC - CCD1619

Reinforced and dielectric LSOH building connection cable

BENEFITS

- Compact Tube® technology for fast and easy installation
- The low-friction sheath material makes it easy to use in ducts.
- The LSOH-FR* sheath offers added safety to building occupants.
- Enhanced mechanical resistance to pulling and rodents.

APPLICATIONS

- ACOPTIC® brings together ACOME's optical cables solutions for Telecom networks.
- CCD1619 cables are designed to allow for the use of a single cable for passing between the exterior and interior of a building. It therefore offers resistance to outdoor conditions (UV stability, etc.) and indoor conditions (LSOH-FR*).
- Generally used in ducts (pulling) from the last outdoor junction box to the cable box inside the building.

RECOMMENDATIONS

Mise en oeuvre

- Les câbles sont fournis avec un emballage de protection qui doit être maintenu jusqu'à complète utilisation du produit.
- Les règles de stockage, transport, et pose des câbles sont définies dans notre guide ACOPTIC
